

KIT.SOLUTIONS is an all-Italian project based on the sound experience of Deltabi Costruzioni, a company founded in 1980 specializing in the design and construction of steel structures for industrial, commercial and residential use.

New market needs require constant attention and on-going adaptation. This is why we decided to develop an easy-to-use, fast concept with 100% Italian quality: KIT.SOLUTIONS offers simple, practical, standard products which come in a kit. They are delivered to the customer fast, with all necessary documents, saving on design costs and time.

## ABOUT KIT.SOLUTIONS

KIT.SOLUTIONS is a practical, ready-to-install concept of modular KIT structures: it gives customers the opportunity to have permanent structures available to them for the first time at transparent prices, with clear characteristics, cutting out the middleman. All the materials come in a packed kit and all kit components are labelled for shipment. All standard structures can be customized with optional accessories to meet buyers' needs perfectly.

## DOCUMENTS SUPPLIED

- Architectural drawings;
- Engineering calculation and analysis report;
- Structural drawings to hand over to relevant authorities;
- Installation Manual;
- BOMs;
- Certificates of structural materials;
- Technical data sheets and declarations of conformity;
- Packing list;
- Certificates of origin (if required).

## STRENGTHS

- Permanent and long-lasting products;
- Earthquake-resistant structures;
- Thermal insulation;
- Savings on design costs and time;
- Materials ready starting from 3 weeks from your order;
- "Made in Italy" warranty;
- Easy DIY installation;
- Complete documentation for installation, shipping and most bureaucratic formalities;
- Deliveries all over the world;
- Customization on request.

## DELIVERY

One of the major advantages offered by KIT.SOLUTIONS is reduced manufacturing time, materials being **ready for shipping starting from 3 weeks from your order confirmation and delivered Ex-Works (EXW)**.

All kit components are labelled for shipment and the relevant codes are used in the installation manual for quick, easy identification.

## TRANSPORT

KIT.SOLUTIONS products are delivered Ex-Works (EXW), loaded on containers or trucks according to the destination, complete with all documents required for shipping (transport document, packing list, certificates of origin, etc.).

**We can also provide a full service by including arrangement of national and international transport, by road or ship, on request in the KIT.SOLUTIONS supply.**

## INSTALLATION

KIT.SOLUTIONS products have been designed to be easily self-installed by a customer's technical staff using appropriate installation equipment, when available. All products are supplied with the relevant installation manual providing step-by-step instructions, from preliminary site operations till final steps. **Technical supervision or installation by KIT.SOLUTIONS skilled staff are also available on request as an extra service.**
