KIT.18x48 MINIMAL is a detached shed with a double-pitched roof, consisting of hot-dip galvanized steelwork with spandrel sandwich panels, main door and industrial sliding door.

COLOURS

RAL8017 RAL3009 RAL600	5 RAL5010	RAL9006 RAL9002
DESCRIPTION	TECHNICAL SPECIFICATIO	ONS
 Load-bearing structure Predesigned, welded, bolted structural steelwork, protected with hot-dip galvanization. Material S235JR - S275JR - S355JR ISO 10025-1/2. Grade 8.8 bolting material Roof panels Roof in sandwich panels consisting of two galvanised sheet layers filled with an inner core of polyurethane foam (PUR). Wall panels Walls in sandwich panels consisting of two galvanised sheet layers filled with an inner core of polyurethane foam (PUR). Walls in sandwich panels consisting of two galvanised sheet layers filled with an inner core of polyurethane foam (PUR). Gutters Gutters in galvanized, pre-painted, shaped metal sheets. Down pipes Down pipes in galvanized, pre-painted, shaped metal sheets, including running outlets, collars and accessories. Metal sheets Galvanized, pre-painted, shaped metal sheets for ridges, corner joints, flashings and eaves and any other necessary element. Industrial sliding door Aluminium industrial sliding door in sandwich panels, with tracks and accessories 	Dimensions Total m2	18,00x48,00 m 864,00
	Usable height Column distance	5.00 m
	No. of doors	1 dim. 1,30x2,10 m
	No. of main industrial doors Wind	1 dim. 4,40x4,30 m 25 m/s
	Earthquake-resistant Roof load	YES 140 kg/m²
	Roof	Panel thickness 50+40 mm
	Roof thermal transmittance Walls	(U) W/m²K = 0.43 Panel thickness 50 mm
	Wall thermal transmittance	(U) W/m²K = 0.45
for opening. Door Single door with push bar and accessories.		

DOCUMENTS SUPPLIED

- · Architectural drawings
- $\cdot\,$ Engineering calculation and analysis report
- · Installation Manual
- $\cdot\,$ Technical data sheet, manuals and declaration of conformity
- Structural drawings of steelworks to hand over to relevant authorities
 BOMs
- · Certificates of structural materials
- · Certificates of origin (if required)

ADDITIONAL OPTIONAL CARD

OPTIONAL PRODUCTS

· Skylights

- · Wind-catchers or SHEVS (Smoke and heat exhaust ventilation systems)
- · Lifelines
- · Cage ladder for access to the roof
- · Recessed fasteners (hidden screws)
- · Additional industrial sliding doors 4.70x4.30 m
- Additional doors 1.20x2.10 m

OPTIONAL SERVICES

Transport in Italy and all over the world

KIT.SOLUTIONS products are delivered Ex-Works, loaded on containers or trucks. Transport can be included in the supply, with all necessary shipping documents.

Installation by skilled staff

KIT.SOLUTIONS products have been designed to be self-installed by skilled technical staff using appropriate installation equipment. Should this not be case, our installation team will be available for a quick, safe, turnkey solution.

Technical supervision during installation

DIY installation can be complemented with technical supervision of all installation phases.

Foundation design

Foundation design and plans can be included in your order on request (only drawings showing template positions and stresses are included in the basic supply). Two standard foundation designs are available to this purpose. Should these loads differ from your expectations, a new, customized design can be requested.
